

# SALT SHORTAGE

**The Town of Cicero would like to inform residents that there is currently a regional road salt shortage due to limited availability from salt mines in the Detroit area.**

**As a result, the Town of Cicero is prioritizing salt usage to ensure public safety. At this time, salting operations are being limited to major intersections, railroad crossings, and traffic signals.**

**Residents may notice reduced salting on local and residential streets. This measure is necessary to conserve available supplies while maintaining safety in high-traffic and critical areas.**

**We appreciate the community's patience and understanding as we manage resources during this shortage. The Town of Cicero will continue to monitor conditions and provide updates as additional salt becomes available. Please use caution when traveling during winter weather conditions.**

**Please: Slow down. Be patient. Be kind. Be vigilant.**
